

Do you have a story about your experiences with your child with disability and/or medical complexity in healthcare?

Have you ever wished you could use that story to teach medical students and residents?

Do you want help to:

- Write that story?
- Learn about “competencies” in medical education?
- Use that story to create and deliver an education session to medical trainees?

Here is your chance...

The University of Wisconsin-Madison is partnering with the Bluebird Way Foundation to host and produce quarterly, virtual Family-Led Academic Grand “FLAG” Rounds focused on Ableism (discrimination toward children and adults with disabilities) in Pediatrics.

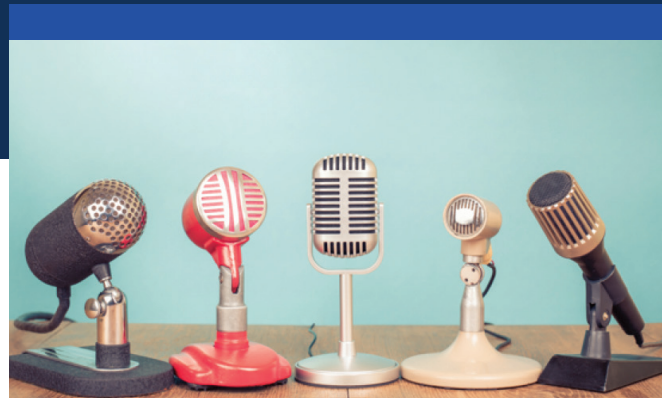

FLAG Rounds flips the traditional model of Grand Rounds¹ and adopts families as educators.

Who can submit a story?

Parent, guardian, sibling, or other family member who:

- *is or has been* a caregiver for a child with disability and/or medical complexity
- *lives in the U.S. or Canada*
- has a story (positive or negative) about disability *that either you or your child with disability and/or medical complexity have experienced* in healthcare

No writing or teaching experience is necessary.

For more details and how to submit?

<https://bit.ly/FLAGroundsStories>

(If you have trouble submitting this form, you can email info@flagrounds.org)

Submissions are due by October 1, 2024.
Selections will be made by October 31, 2024.

Would you like more information?

- Attend the FLAG Rounds FAQ webinar on August 22, 2024 2pm CST
<https://bit.ly/FLAGroundsFAQ>
- Email info@flagrounds.org

Compensation will be provided and discussed further at the FAQ webinar.

¹Grand Rounds are a formal meeting at which physicians discuss the clinical case of one or more patients. Grand Rounds originated as part of residency training wherein new information was taught and clinical reasoning skills were enhanced. Grand rounds today are an integral component of medical education. They present clinical problems in medicine by focusing on current or interesting cases. They are also sometimes utilized for dissemination of new research information. https://www.rxlist.com/grand_rounds/definition.htm
